

We have recently reviewed our mission statement. We discussed this with stakeholders and have developed our existing statement. Our new mission statement is as follows:

*Our school is at the centre of our local community and provides a safe and nurturing environment where everyone develops a sense of self-worth and achievement. We believe that every person matters!*

At Brookvale it is our goal to ensure our children have the very best life chances. We recognise the importance of education and that children only get one chance at being at primary school. We recognise the crucial part we can play in our children's lives and endeavour to ensure we provide the very best education possible. We aim to ensure children leave us with academic outcomes that ready them for the next stage in their education and we also aim to ensure we help create well rounded, confident and well respected children who have a set of values that will uphold the values we see as important. Our values are based on the fundamental British values identified recently by the Department for Education. We work with the children to develop their understanding and knowledge of these values. We supplement these core values with other values that complement them.
