

# The Curriculum

## **SCHOOL MISSION STATEMENT**

At Brookvale Primary School our aim is to provide a safe and happy place at the heart of the community where everyone has a sense of self worth and achieves to the best of their ability. In our school we believe every person matters.

At Brookvale we offer a broad and balanced curriculum based on the core subjects of:-

### **ENGLISH, MATHEMATICS & SCIENCE**

Along with the following subjects:-

### **HISTORY, GEOGRAPHY, MUSIC, ICT, ART, DESIGN TECHNOLOGY, P.E. , R.E.**

We have worked hard to ensure our curriculum is broad and balanced and provides opportunities for children to engage in memorable and inspiring experiences.

We teach Maths, English, Science, RE, PE and PSHE as discreet subjects and other subjects through our topics. We do however look for cross curricular links so that skills and knowledge can be used in all lessons.

At Brookvale Primary School we endeavour to ensure that:

1. Each child is equipped to reach their full potential and make the most of their Secondary Education, by leaving Brookvale with good basic skills in English and Mathematics.
2. Each child should have an enquiring mind and a lively curiosity about the world around them.
3. Each child should have a sense of concern for others, should understand and appreciate the cultural differences between members of our community and be able to form stable and worthwhile relationships.
4. Each child should understand a "healthy lifestyle", respect and value their health and learn to use their leisure time purposefully after being introduced to a range of worthwhile leisure activities.
5. Children should learn to appreciate and safeguard the local and the wider environment and work to make the school, its surroundings and the wider locality a tidy and attractive place.
6. Each child should have a good understanding of the importance of British Values so that they can play an active and useful part in society.

Each child should be able to use Information Technology and be familiar with the technological aspects of modern life.
